

Call For Research Posters

An Opportunity To Showcase Your Research
Poster At Energy In Agriculture 2018

Possible topics could include

- Energy production from Agri sources (raw or processed residues)
- Energy efficiency in Agriculture or Agri processing
- Carbon efficiency and carbon management in agriculture including other greenhouse gases
- Novel and innovative use of land and / or agriculture to reduce climate, air or water pollution.
- Advanced generation bioenergy vectors
- Improving biomass production
- Bioactive compounds from biomass
- Metabolic engineering of fermentation processes
- Micro and macro algae technology
- Biocatalysis for bioresource transformation
- Nutrient and energy cycling
- Bioproducts from woody biomass
- Plant cell wall modification
- Case studies / Pilot plants
- Pre-treatment and transformation of lignocellulosics
- Environmental biotech
- Thermochemical transformations of biomass
- Valorisation of biomass waste streams
- Other related Research

Qualifying Researchers

- Post Graduate students and other researchers from 3rd level & public bodies
- Full time academic and public-sector researchers
- Part time applied research funded under local, national and international research programs
- Irish SME's participating in applied research with a third level college.
- Other researchers subject to judge's discretion

PRIZES

1st €500

2nd €250

3rd €100

Closing date 29th June
